

Big picture:

- [Green Velvet, Harvard Bass - Lazer Beams \(Original Mix\) \[Relief Records\]](#)
- [Austin Powers - Sharks with lasers](#)

-
1. -Apply plasma physics, I can go deeper in depth later, if needed
 - a. Specifically, it seems that uv rays seem to be the most deadly to skin. So, exposing cancer cells to uv rays will probably zap them.
 2. -<https://www.youtube.com/watch?v=jdjTYlReE-I> destroy the core! Target these cells <https://www.broadinstitute.org/news/researchers-find-genetic-%E2%80%9Cachilles-heel%E2%80%9D-ovarian-and-uterine-cancers> , zoom in on them if needed!
 3. - [How Do Smart Magnets Work?](#) (these can pull together the particles of SLC34A2 for efficient extraction). Perhaps a modification such as [I Made a Real Magnetohydrodynamic Drive](#) to work well in the body, descale it.
 - a. Can probably even further incorporate electromagnetism for a more efficient magnet.
 4. Extract the scattered and shattered phosphate cells
 - with medical suction device, programmed to remove broken down SLC34A2.[\(https://www.youtube.com/watch?v=sOrjFxxdYRs\)](https://www.youtube.com/watch?v=sOrjFxxdYRs)
-

Boom, no more cancerous and toxic cells.
