

Here is a rough outline for an idea for crypto essentials.

Convert global Health based companies to cryptos:

- Global healthcare cryptos with decentralized coins that currently exist.
- Base health tokens that provide a “base or stability health level”
 - and then health tokens that can enhance humans in different sports modes or if individuals want to tweak their base levels.

New tech cryptos:

- Individuals can choose and customize their purchased tech.
- There can be suggestions, or individuals can create their own food items - with combining blockchains.
- Tied to plasma energy
(<https://www.thedailybeast.com/mit-engineers-created-a-portable-device-that-zaps-seawater-to-make-drinking-water>) can probably soon be modified to convert various forms of energy.

Sports based cryptos:

- Can modify, enhance, or keep current sports.
- Each token or blockchain can almost serve as a portal, where the community can do bets or whatever for different activities within the blockchain.

Housing based cryptos:

- Allow individuals to construct their housing at a fluid or stable level, depending on their preferences. They can convert their base + incomes in order to customize their own living spaces.
- Multiple individuals can contribute to housing crypto, if desired.

Income based cryptos:

- Each job has their own crypto where they pay their employees. The employee each has their own meta profile where they can receive income based on their work.
- Each profile can have multiple sources of income streams.

Education Cryptos:

- Brilliant
- Coursera
- Youtube
- Universities

-etc

Travel cryptos:

-charging stations/flying vehicles paid through cryptos
