

Big Picture:

-  The Future of Augmented Reality: 10 Awesome Use Cases

---

-Part of the essential package for all humans.

-can flow various apps through their chips, and users can opt in for updates based on their preferences.

---

Through Tesla energy

With meta profiles (only 1 profile per person).

Stored in google cloud.

From android.

Include CVShealth vitals .

Install calculated packages from fairlawn for basic universal income, with fluidity for seasonality.

Rise above basic universal income from idea generation and desire to learn.

After giga stations are installed, there should be equal opportunity for all.

-Tesla gigafactories can pivot in different sections various outputs

-I.E. car output section, chip output section, medical output section, food, etc.

-Perhaps even specialized per region, based on demand, seasonality, environmental conditions, cultural differences,

---

Can our bodies be able to convert energy such as the gigafactories, at a smaller scale? For individual consumption such as food, drink.
