Why?

Through BNB blockchain and data protection, it could be possible to grow at a relatively constant user speed universally – to make sure nobody is left behind, during exploration travels.

How?

Certain astrophysicists are probably bored in their work and looking for new opportunities. Time to turn some “theoretical” or conspiracy theories into empirical evidence! /.

Profitability

Exponential growth, nobody has to fear not earning their place, as people’s ideas can be: appreciated, validated, supported, encouraged, welcomed, and safe.

Details:

It is possible to look into plasma physics and electromagnetism (mentioned earlier) to transform these ideas into monetary values, through the metaverse.

More logistics:

Can be universally decentralized through cryptoslate, and transactions through TrustWallet.

Also able to plug in quantum deductions.
