

Big Picture:

- Fully EV by 2023 in America (jack up the price of gas).
 - Incorporate ridesharing ( \$2593 ridesharing in a Tesla rental)
 - but fully automatic
 - government will get profits (great economic potential in long run)
 - Reallocate teslas, government issue stimulus for old ones.
 - Old vehicles can be handed over for teslas (if individuals opt in).
 - Old vehicles recycled for parts and then transitioned into energy
-

Then:

- Old vehicles scraps for flying vehicles.
