1. -Apply plasma physics, I can go deeper in depth later, if needed
 2. -<https://www.youtube.com/watch?v=jdjTYIReE-I> destroy the core! Target these cells
<https://www.broadinstitute.org/news/researchers-find-genetic-%E2%80%9Cachilles-heel%E2%80%9D-ovarian-and-uterine-cancers> , zoom in on them if needed!
 3. -  How Do Smart Magnets Work? (these can pull together the particles of SLC34A2 for efficient extraction). Perhaps a modification such as
 I Made a Real Magnetohydrodynamic Drive to work well in the body, descale it.
 4. Extract the scattered and shattered phosphate cells
-with medical suction device, programmed to remove broken down SLC34A2.
