

Big Picture:

📺 Cryptocurrency: The Future of Finance and Money

---

How:

- Pivot current proportions of material holdings into various forms of crypto currencies.
  - The top of the stack is popped proportionally at different income levels in order to empower everyone.
  - Everyone will have accessibility to energy, which will be publicly monitored.
  - There are individuals and companies with a lot of cash on hand that can serve as a foundation for this.
  - Democratized currencies will allow interactions for all humans.
- 

Why:

- No time stressing about taxes, payments, due dates, and other life stresses.
  - Everyone has access to equal resources.
  - Free choices.
  - Everyone is empowered.
- 

Questions:

- How creative can machines be?
- Will individuals still be able to generate their own income sources based on their ideas?
- Any potential risks with this plan at the moment? I do not see any.
- How do we make global decisions, so everyone in the world is aware of decisions as they are being made?
  - Right now in the world, some people are WAY behind.
