Life Lesson 101..

My ex-girlfriend, who's brilliant, preached this to me once when I identied dark forces attempting to sabotage my success and livelihood. In response, she said....

"Sometimes You Have To Play The Role of a Fool to Fool the Fool Who Thinks They Are Fooling You."

 $[\frac{2}{3}]$

Hi Mohsen. I am glad you had somebody to support you. I hope that you are able to accumulate these lessons to prevent future discharges in your community.

[3/3] <u>Ethan Norton</u> Unfortunately, while our mindset, knowledge and awareness can help prevent further efforts to hurt one's livelihood, it can't stop the effort.

Regardless, It's amazing how one's mindset can vibrate throughout their soul and change our energy. My having the right mindet, one can change their frown into a smile.ife lessons are learned by either three ways, through our parents, through formal education and training, or through life experiences, especially hardships, which is the biggest learning lesson of the three.

When my ex taught me this life lesson, I couldn't help but think about how brilliant people like to play the board game chess, so I searched the internet for the answer for: "why are people who play chess so smart?" I then came across an article that said:

"They have a good memory, pattern recognition, excellent calculation abilities, and are strategic thinkers. This system of thinking is what makes chess players smarter than the average person."

8 Reasons Chess Players Are Smart:
